

SAMUDAAY

AI-Powered Decision Intelligence
for Indian Communities

Gen AI Academy APAC Edition | Hack2Skill

Built with Google Cloud + NVIDIA

Submitted by: Bonthala Teja Prakash

Problem Statement

AI for Better Living & Smarter Communities

AI for Better Living & Smarter Communities

The Challenge

Indian communities (RWAs, apartment complexes, small towns) generate massive data from:

Utility bills & energy consumption

Waste management records

Water usage & quality reports

Citizen feedback & complaints

Local traffic & mobility data

Emergency incident logs

But this data is SILOED, UNSTRUCTURED, and NEVER analyzed.

The Opportunity

What if communities could:

Ask questions in their local language

"How much water did we use this month?"

Get AI-powered predictions

"Water crisis risk: HIGH 22 days left"

Automate citizen services

Auto-respond to complaints, flag urgent issues

Make data-driven decisions

Optimize waste collection routes in real-time

Our Solution: SAMUDAAY

AI-Powered Decision Intelligence Platform

Samudaay transforms raw community data into actionable intelligence through a conversat...

Key Features

10 Core Capabilities

CommunityGPT

WhatsApp chatbot in local languages. Ask in Hindi/ Telugu/Tamil get answers in seconds

Smart Dashboard

Real-time community metrics: water usage, waste pickups, energy consumption, citizen se...

Predictive Alerts

AI predicts water shortages, waste overflow, power outages 7 days in advance

Waste Optimizer

Route optimization for waste collection using real-time fill levels + traffic data

Water Monitor

Track usage, detect leaks, predict shortages using BigQuery + NVIDIA RAPIDS

Auto Complaint System

AI classifies, routes, and responds to citizen complaints automatically

Emergency Response

Real-time alert system: floods, fires, medical emergencies auto-notify + resource map

Community Pulse

Sentiment analysis on feedback. Gemini understands emotions in 10+ Indian languages

Sustainability Score

Carbon footprint tracking. Gamified community challenges for green living

Responsible AI

Explainable decisions, bias detection, privacy-first design with privacy

What Makes Samudaay Unique?

Competitive Advantages

Whatsapp-First Design

No app download needed. Works on any phone. 500M+ Indians already use WhatsApp daily.

Multilingual AI

Gemini-powered NLP understands 10+ Indian languages natively. Rural communities included.

10x Faster Processing

NVIDIA RAPIDS + cuDF accelerates BigQuery analytics results in seconds, not hours.

99% Cheaper than Alternatives

Serverless Google Cloud architecture. Pay-per-use. No infrastructure cost for communities.

Self-Learning System

AI improves with use. Pattern recognition gets smarter as more community data flows in.

Open & Extensible

API-first design. Integrates with existing municipal systems. Plug & play.
